

Kushall Jain

Kushall Jain

Software Development Engineer — Full Stack Web Development • RESTful APIs • Cloud Architecture

kushall.jain07@gmail.com | linkedin.com/in/kushall-jain-263009261 | github.com/kushallj | kushall.in | 9990079764

PROFESSIONAL SUMMARY

Software Development Engineer with 3+ years of professional experience designing, developing, and deploying enterprise-grade web applications and RESTful APIs serving 1000+ SMEs with 10,000+ daily active users. Proven expertise in full-stack development using React (JavaScript/TypeScript), Python backend services (Django/FastAPI), Node.js, and SQL databases (PostgreSQL, MySQL). Strong foundation in SOLID/OOP principles, microservices architecture, and agile development methodologies. Successfully delivered mission-critical systems processing 150+ Cr monthly transactions with 99.5% uptime. Currently expanding expertise in C# and .NET ecosystem to complement full-stack capabilities. Demonstrated ability to translate business requirements into technical solutions, collaborate across cross-functional teams, and deliver high-quality, maintainable code from design through production deployment.

TECHNICAL SKILLS

Programming & Web Development: Python (FastAPI, Django REST Framework), Node.js (Express), JavaScript/TypeScript (ES6+), SQL, React.js, HTML5, CSS3 — Currently Learning: C# fundamentals, .NET Core basics

Architecture & Design: RESTful API Design & Development, Microservices Architecture, MVC Pattern, SOLID Principles, OOP Concepts, Design Patterns (Factory, Singleton, Strategy), Clean Code Practices, Async Programming

Frontend Development: React.js (JavaScript/TypeScript), Redux Toolkit, React Hooks, Material UI, Responsive Design, Single Page Applications (SPA)

Databases & Data Management: PostgreSQL (Advanced), MySQL, SQL Optimization, Query Performance Tuning, MongoDB, Django ORM, Complex Joins

Cloud Services & DevOps: AWS (S3, ECS, IAM), Docker (Containerization), Git/GitHub, CI/CD Pipelines (GitHub Actions), Postman

Development Methodologies: Agile/Scrum (Sprint Planning, Daily Standups, Retrospectives), Continuous Integration/Deployment, Version Control, Documentation Best Practices

PROFESSIONAL EXPERIENCE

Full Stack Software Developer

Proffin Pvt Ltd (FinTech Sector) | Dec 2023 – Present | Delhi, India

- Designed and developed mission-critical financial platform serving 1000+ SMEs with 10,000+ daily active users, processing 150+ Cr monthly transactions with 99.5% uptime using React, Python (Django/FastAPI), PostgreSQL, and AWS
- Built scalable, responsive front-end using React 18 with TypeScript, Redux Toolkit state management, and component-based architecture following modern web development best practices
- Implemented secure, performant backend using Python (Django REST Framework, FastAPI) handling 10,000+ API requests/day with comprehensive validation, error handling, JWT authentication, and monitoring
- Developed 10+ RESTful microservices implementing proper HTTP methods (GET, POST, PUT, DELETE), request/response validation using Pydantic, role-based authorization, and comprehensive API documentation using Swagger/OpenAPI specifications
- Created credit scoring rule engine, automated lending workflows, and real-time financial data processing services using Django for high-performance endpoints with async processing via Celery task queues
- Designed normalized PostgreSQL database schemas with proper relationships (one-to-many, many-to-many), constraints, and indexes supporting thousands of concurrent financial transactions
- Implemented Django ORM models with custom managers and queriesets, achieving 70% query performance improvement through `select_related`, `prefetch_related`, and strategic indexing
- Optimized complex SQL queries involving multiple joins, subqueries, and aggregations reducing response time from 800ms to 200ms (75% improvement) through systematic profiling
- Collaborated closely with product managers, designers, and QA engineers translating business requirements into technical specifications through entire software development lifecycle from requirement clarification through deployment

- Actively participated in Agile/Scrum ceremonies including sprint planning, daily standups, sprint reviews, and retrospectives
- Conducted thorough code reviews ensuring code quality, adherence to SOLID principles, and knowledge sharing across team
- Mentored 2 junior developers on Python, Django, React best practices, design patterns, and professional software engineering standards
- Provided architectural guidance for feature implementations considering scalability, maintainability, and long-term technical debt

Subject Matter Expert (Educational Technology Platform)
ByteDance Pvt Ltd | April 2020 – November 2021 | India

- Collaborated with engineering team building Django REST Framework APIs for content management system serving grades 9-12 educational platform achieving 2M+ video views
- Implemented RESTful endpoints for user enrollment, progress tracking, assessment systems, and gamified learning frameworks contributing to 30% enrollment growth
- Participated in full software development lifecycle from requirements gathering through testing and deployment working closely with developers on Python backend and React frontend integration
- Worked on business logic implementation for learning analytics and recommendation engine contributing to 25% increase in user engagement
- Identified and resolved edge cases in content delivery workflows, assessment grading logic, and user interaction patterns improving system reliability
- Implemented data validation logic and comprehensive error handling reducing support tickets by 40% through proactive bug fixes
- Analyzed user behavior data using Python (Pandas, NumPy) processing 2M+ interactions to derive insights for platform feature optimization
- Built automated Python scripts for content validation, data extraction, performance reporting, and bulk operations reducing manual work by 60%
- Created data pipelines for ETL processes ensuring data quality and timely reporting to stakeholders
- Participated in Agile methodologies including sprint planning, daily standups, and retrospectives working alongside product managers, engineers, and designers

- Translated educational requirements into technical implementations bridging gap between content creators and development team

KEY PROJECTS & TECHNICAL DEMONSTRATIONS

Enterprise Financial Platform (Production) | Django REST Framework, FastAPI, React (TypeScript), PostgreSQL, AWS

Full-stack financial application processing 150+ Cr monthly transactions across 25+ institutions. Implemented credit scoring microservices, automated lending workflows, real-time dashboards achieving 85% automation.

DevFrnds - Developer Networking Platform | React.js (TypeScript), Node.js (Express), MongoDB | 2023

- Full-stack developer connection platform with Tinder-like matching interface serving 500+ active users
- Implemented swipe-based matching algorithm, real-time chat using WebSocket, JWT authentication
- Built RESTful APIs for user management, connections, messaging with proper error handling and validation
- Production URL: devfrnds.online — GitHub: github.com/kushallj

EDUCATION

Bachelor of Technology (B.Tech) in Civil Engineering

G L Bajaj Institute of Technology & Management | August 2014 – June 2018 | India

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Web Technologies, Computer Networks

CERTIFICATIONS & CONTINUOUS LEARNING

Frontend Development: React - The Complete Guide (TypeScript), Advanced React Patterns, Redux Toolkit Masterclass

Database & Performance: PostgreSQL Performance Tuning, Advanced SQL for Developers, Database Design and Optimization

Currently Learning: C# Fundamentals (understanding syntax, OOP principles in C# context), .NET Core Basics (exploring .NET ecosystem, ASP.NET Core fundamentals), Microservices with .NET (learning patterns similar to Python/Node.js implementations)

ADDITIONAL INFORMATION

Problem Solving: Active on LeetCode (300+ problems solved) - Strong foundation in algorithms and data structures

Technical Strengths: Rapid learning ability demonstrated through mastering multiple tech stacks (Python, JavaScript, React, Node.js). Strong understanding of SOLID principles and design patterns applicable across programming languages. Experience with enterprise-scale systems handling millions of requests with reliability and performance focus

Professional Approach: Commitment to clean, maintainable code with comprehensive documentation. Proactive in code reviews and knowledge sharing. Focus on long-term system stability and user experience over quick fixes
